

9 Panel drug test

These are the basic 9 drugs that are screened

	Screening Level	Confirmation Level
Amphetamines	1000.00	500.00
Barbiturates	200.00	200.00
Cocaine	300.00	150.00
Marijuana Metab.	50.00	15.00
Opiates	2000.00	2000.00
PCP	25.00	25.00
Benzodiazepines	300.00	300.00
Methadone	300.00	300.00
Propoxyphene	300.00	300.00

*Levels are nanograms per milliliter

*Anything over the confirmation level is reported as a positive.

The first 5 drugs are the “street drugs” tested for in the 5 panel test.

The last 4 drugs are added for the 9 panel, and are the common prescription drugs.
